

LET'S TALK ABOUT WATER

THE CHALLENGE OF WATER MANAGEMENT IN THE WEST

FILM SCREENING AND FACULTY PANEL DISCUSSION

THURSDAY NOV 2, 2017

START: 6:00PM

UC SANTA BARBARA

BREN HALL 1414

RECEPTION TO FOLLOW

Managing water in the American West is a challenge. Pressing issues range from water quality to floods and droughts. With increasing pressures as a result of urban growth and development, managing our freshwater supply from the mountains to the ocean will become ever more complex. The key question is: how do we move forward?

Join us for an evening of: short film screenings, a Bren School faculty panel, UC Santa Barbara graduate student flash talks, and discussion with local water practitioners and environmental groups to explore both the problems and solutions for water management in the American West, and how UC Santa Barbara is answering the call.

BREN SCHOOL OF ENVIRONMENTAL SCIENCE & MANAGEMENT FACULTY PANEL

JEFF DOZIER
Snow Hydrology,
Earth System
Science, Remote
Sensing

ARTURO KELLER
Fate and Transport,
Watershed Mgt.,
Remediation,
Pollution
Prevention
